STEFFEN SYSTEMS

STEFFEN SYSTEMS SQUARE BALE ACCUMULATORS

MODEL 2250

STEFFEN SYSTEMS

operator overrides
located in tractor cab

completely automated
functions housed in a
weather protected
enclosure

features a wider throat
for working with 16x22
three-tie bales

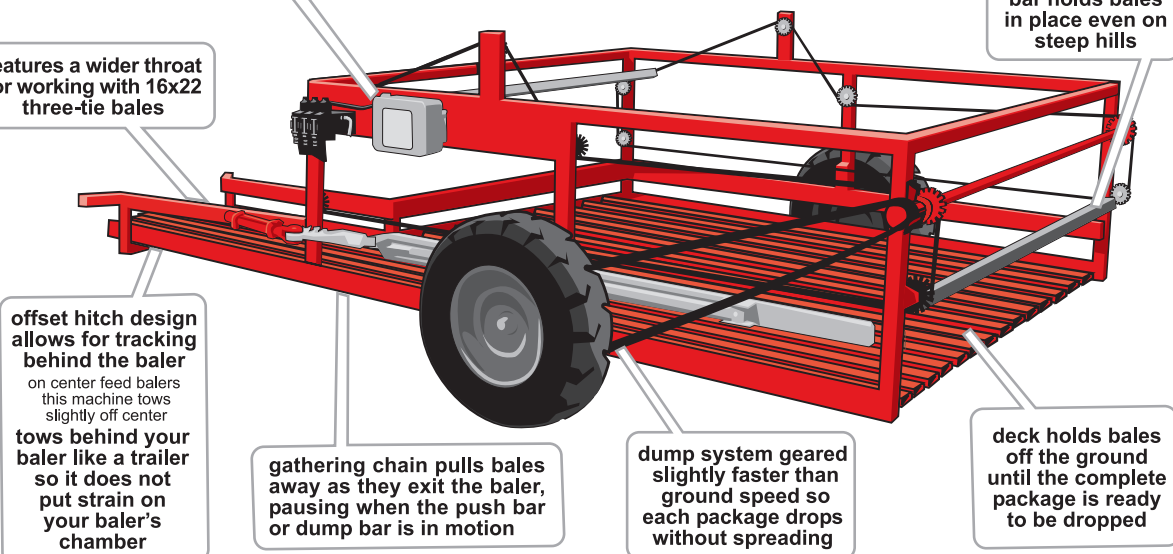

offset hitch design
allows for tracking
behind the baler
on center feed balers
this machine tows
slightly off center
tows behind your
baler like a trailer
so it does not
put strain on
your baler's
chamber

gathering chain pulls bales
away as they exit the baler,
pausing when the push bar
or dump bar is in motion

dump system geared
slightly faster than
ground speed so
each package drops
without spreading

bar holds bales
in place even on
steep hills

deck holds bales
off the ground
until the complete
package is ready
to be dropped

Steffen Systems offers a wide assortment of commercial grade Bale Accumulators capable of packaging eight to fifteen bales. Towed behind your baler, our accumulators connect directly to your tractor's hydraulic remotes and battery - eliminating the need for extra pumps or expensive hitch equipment. Smooth precision functions keep up with any baler's production. Our feed chain eliminates jamming by automatically pulling bales away from your baler, and pausing while the push arm works. Bales will not jam even at high output! Our dump system is tied to your ground speed - creating tight, uniform packages even in steep or rough terrain.

PRODUCT SPECIFICATIONS

shipping weight:	1450 lbs	624 kg
overall length:	166 inches	422 cm
shipping width:	118 inches	300 cm
